

# IMPERIAL VALLEY ORGANICS™

EXPERIENCE THE DIFFERENCE.

# ORGANIC BEEF

Imperial Valley Organics is a certified USDA Organic, grass fed beef program that is founded on practices that promote animal health and welfare, and minimize impact on the environment.

## OUR STORY

At Imperial Valley Organics (IVO) we believe in the importance of being confident in what goes on our plate. We work closely with American ranchers dedicated to sustainable practices and ensure that all our grass fed cattle are guaranteed USDA certified organic, non-GMO, and raised on 100% organic feed from our pasture. Our product contains no antibiotics or added hormones, and each cut of our beef is carefully hand-trimmed. The IVO program is fully certified by the USDA and strictly adheres to organic and grass fed practices at every step of our process to produce beef that you can be confident in.

## OUR PROCESS

Our distribution is integrated with our fabrication and processing, meaning that we can cut overhead and share the savings. We directly control and customize our program to best fit our customers, and are capable of a wide variety of organic, grass fed items ranging from center-of-the-plate cuts to trimmings for grind—and everything in between.

## OUR SUPPORT

One World Beef offers a variety of support materials and branding collateral for each of our programs. Ask your sales representative for more information.
